ABOUT ME

I'm a 29-year-old Brazilian Full Stack Developer with 5 years of experience.

My main tech stack includes: Typescript, JavaScript, C#, React, NextJS, NodeJS, NestJS, Docker, MongoDB, AWS, and GCP.

I'm currently based in the United States, where I live with my wife and our young daughter. In my free time, I enjoy working out and playing video games.

EDUCATION

Bachelor's Degree in Computer Engineering (Jul 2015 - Jul 2021)
Universidade Tecnológica Federal do Paraná (UTFPR)

EXPERIENCE

Career Break - Jul 2025 to Present

Took time off to care for my daughter while continuing to build and ship personal projects.

- Shelflog — A web app for tracking my game collection, surfacing which titles I'd bought but hadn't played yet. It cut my spending on games noticeably over the past year. Built with Next.js, NestJS, MongoDB and an IGDB integration, hosted on Fly.io and Vercel.
- Commissioningo — An industrial commissioning tool built for a friend working in engineering, designed to let him commission industrial equipment in environments with no internet connection. Built with React, React Native, NestJS and PostgreSQL, hosted on Fly.io with Neon (Postgres) and Upstash (Redis).

Senior Full Stack Developer (Jan 2023 - Jun 2025) Grupo Boticário

Contributed to the design and development of two new products using microservices and microfrontend architecture. Besides coding, I actively participated in product refinement sessions and contributed to application design, showcasing strong communication and collaboration skills.

- ✓ React / Microfrontends
- ✓ Node / NestJS
- ✓ MongoDB / PostgreSQL
- ✓ AWS / Docker / CI/CD
- ✓ Git / Postman
- ✓ C# .Net

Full Stack Developer → Tech Lead (Sep 2020 - Dec 2022)

Axion Digital

Joined as Full Stack Intern and quickly progressed to Tech Lead within two years. Architected and delivered full-stack web and mobile applications. Worked with React, React Native, Node.js, NestJS and MongoDB.

- ✓ React / React Native / PWA / NextJS / Web5
- ✓ Node / NestJS / Parse Server
- ✓ MongoDB / Firebase
- ✓ AWS / GCP / Docker / CI/CD
- ✓ Git / Postman / Strapi / Grafana

Software Quality Assurance Intern (Jan 2019 - Dec 2019)

Cielo

Worked in the QA department supporting automation and test monitoring for multiple squads. Also helped implement mock systems for product validation.

- ✓ Java / Ruby / JavaScript
- ✓ Cucumber / BDD
- ✓ Wiremock / Postman
- ✓ Docker / ELK / Linux

ACADEMIC PROJECTS

Database Course Monitor (Mar 2018 - Dec 2018)

UTFPR - CP

Monitored a core subject at the university with high failure rates. I supported students during office hours, clarified doubts, and created documentation and guides for using database tools.

Scientific Research in Experimental Physics (Mar 2017 - Mar 2018)

UTFPR - CP

Worked on improving lab equipment by creating a touch interface for automating data collection in physics experiments. The tool captured and visualized real-time data and exported it to Excel.

ADDITIONAL INFORMATION

Languages

- Portuguese – Native
- English – Advanced

Work Authorization

- Authorized to work in the United States (L-2 visa).
- All visa requirements and compliance processes are handled by the company employing my spouse.
